Skills

Languages: JavaScript, Python, Swift, HTML, CSS, SQL

Technologies: React.js, Node.js, GraphQL, AWS, Git, PostgreSQL

Projects

Villain Cuts Website | React | [Project Link](#) | [Source Code](#)

- Created a website using React for a haircutting business where users can learn about the business and contact the owner to schedule an appointment.
- Implemented the Material UI design library to create a consistent, attractive design.
- Incorporated a contact form to forward submissions to the owner's email.

GitHub Followers | Swift | [Source Code](#)

- Built an app using GitHub's API to allow the user to search for a user and view their list of followers.
- Implemented a search function to search for a specific follower and view their profile.
- Incorporated persistence for when a user adds a profile to their favorites list to remain in the list even when the app is closed.
- Integrated dark mode into the app to improve user experience in dark environments.
